Better Function. Better Design.

SAFER. LIGHTER. SMARTER.

D2[™] | Milliken[™] Convertible Flooring

WITH **ADAPTEX[™]**
ACTIVE SURFACE TECHNOLOGY

D2[™] (Dynamic Design) is the first-ever innovation within Milliken's new Convertible Flooring[™] category. This radical new two-part system optimises function and design.

Prior to D2, increased floor safety and stability was achieved only by adding weight to conventional mats, or through permanently installed flooring. These solutions meant users had to compromise aesthetics or flexibility. With D2 Convertible Flooring, you can divide and conquer—getting the best of both worlds. The textile Tops are lightweight, functional and easy-to-clean, and are anchored to the floor via Bases leveraging Milliken's patented Adaptex[™] Active Surface Technology.

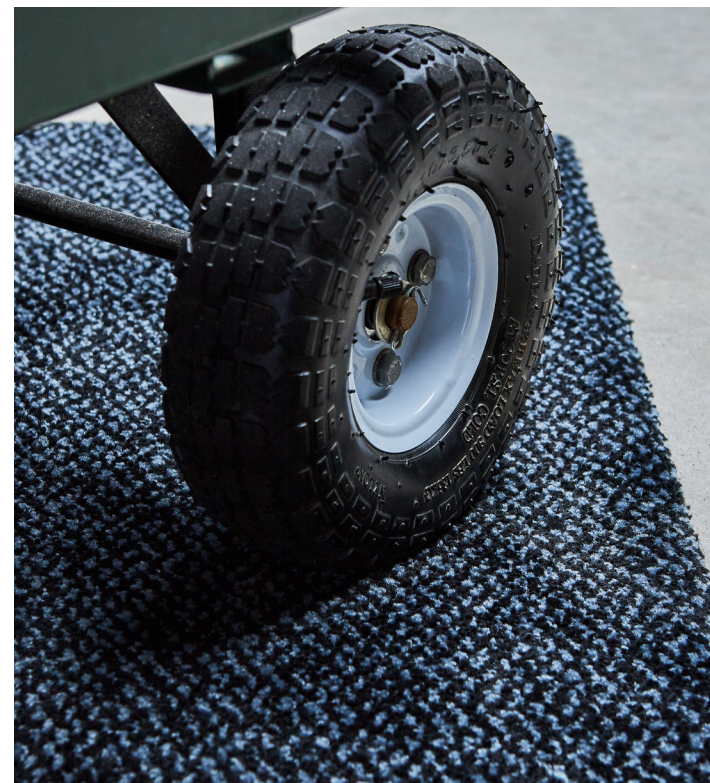

Never Compromise. Divide and Conquer.

D2's two-part design delivers the flexibility of conventional mats with the stability of installed flooring. Easy to deploy, clean and maintain, D2 placements do not move, shift or migrate.

An industry-first in maximising both stability and design, the low-profile, lay-flat D2 placement minimises slip, trip, and fall risks and enhances the overall aesthetic of any space.

ADAPTEX[™]
ACTIVE SURFACE TECHNOLOGY

This patented technology uses magnetic attraction to actively lock the D2[™] Top and Base together. Once paired, the lightweight Top stays in place—it won't move, migrate or shift—yet lifts easily off for cleaning. Adaptex enables this dual-functionality previously unavailable in flooring solutions.

Key Features

ANCHORED FOR STABILITY

- Two-part system locks together, actively resisting movement
- Reduces opportunity for slips, trips, and falls

LIGHTWEIGHT TOP

- Top is designed for cleaning independent of the Base
- 20-50% lighter than conventional mats

THIN, FLAT SYSTEM

- Attractive, low profile design fits safely and seamlessly
- Lay-flat reinforced edge diminishes kick-up

MODULAR DESIGN

- Two-part design pairs premium stability with modularity
- Fully customizable/configurable
